DISCOVER POLYNUCLEOTIDES

## THE SECRET TO FIRM AND HYDRATED SKIN

Ameela is an innovative injectable solution based on natural polymerised polynucleotides. It is a highly moisturizing gel that restores skin firmness and elasticity and ensures healthy skin, that is protected against cellular damage.

The production of collagen gives a strong, specific lifting and revitalising effect that is suitable for all skin types. Injections of polynucleotides may be layered with hyaluronic acid-based fillers. Ameela reduces the degradation of Hyaluronic acid up to 40%.

Highly  
moisturising

Acts as an  
antioxidant

Reduces fine lines  
and wrinkles

Reduces dark circles  
and eye-bags

## TREATS THE PERIOCULAR AREA

### INDICATIONS

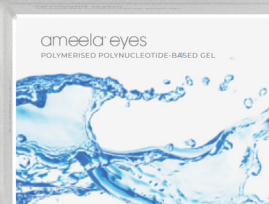

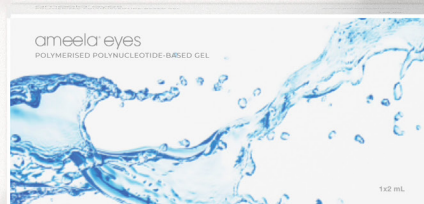

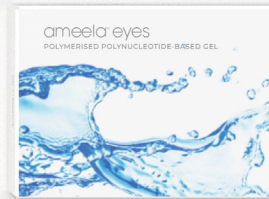

EYE-BAGS AND DARK CIRCLES

PERIOCULAR WRINKLES

POOR CIRCULATION

DEHYDRATED SKIN

Ameela Eyes thickens and restructures the tissue around the eyes, resulting in an improvement of superficial wrinkles without the use of fillers. Further benefits include: Reduces eye-bags and dark circles, improvement in skin quality and diminishes superficial wrinkles.

# ameela® rejuvenation
